phData Example Proposal

phData

Agenda

1. <Instructions: Provide agenda >

Project Overview/Business Problem

<Instructions: **Paragraph 1** - Tell us who the customer company is and a little about them. Describe your understanding of the technical and business goals that the customer is looking to achieve. This could also be the pain points they are experiencing. Include understanding of current state, and desired future state.
Paragraph 2 - Provide an overview of "what" phData will do the help customer achieve its goals.>

Approach to a successful <project name/description>

<Instructions: This should provide a high level overview of the project approach phData is proposing. The approach will depend on the use case/project you select for you project challenge. Feel free to add visuals/graphics, if want to help tell the story.>

Business Value/Business Case

<Instructions: This slide should articulate the value the customer, business, users will get from the proposed solution. This slide should answer the question, “why should we invest in this solution?”. Feel free to add visuals/graphics, if wanted to help tell the story.>

<Project Name Phase(s)>

Activities

<Instructions: List out activities that will be completed in this phase of the project. Depending on the number of phases you can copy and paste this template slide to create additional phase slides.>

Resource Plan

<Instructions: Provide title and description of the team you see required from phData in order to successfully complete this project. Feel free to add more resources as needed. Also, if you have a better or easier slide to edit and show resources please feel free to use your own. This is just an example.>

<Title>

<role and responsibilities on the project… What activities will this role be responsible for?>

<Title>

<role and responsibilities on the project… What activities will this role be responsible for?>

<Title>

<role and responsibilities on the project… What activities will this role be responsible for?>

<Title>

<role and responsibilities on the project… What activities will this role be responsible for?>

Project Timeline

<Instructions: Provide a timeline for the project phases as needed based on your approach. Include critical milestones. Also, if you have a better or easier slide/graph to edit and show a timeline please feel free to use it. This is just an example.>

Project Pricing

<Instructions: Provide a project cost. You have the option of using cost per phase or cost per resource. You will not be tested on actual price, the goal is to understand how you present cost to customer stakeholders. Feel free to use round numbers and your experience/knowledge on resource billable rates>

Option 1:

Phase	Duration	Pricing
<phase name>	# Weeks	$x,xxx
Project Total	## Weeks	$xxx,xxx

Why phData

<Instructions: This one may require some research on phData and data consulting services companies. Provide a list of reasons based on your knowledge as to why the customer should select phData to help them with their project.>

1. <why phData>

Next Steps

<Instructions: Provide next steps coming out of this proposal call that are needed to start engagement/project>
